The press, the world over, is teeming with praise of Huggins' latest work, "Jess." The following is from a half column notice in the New York Tribune: "Mr. Huggins continues to keep out of the beaten track and to write stories which are full of imagination, realistic description, stirring action and romance. His last novel, 'Jess,' is a Transatlantic tale, and all the more interesting because it makes us acquainted with a people whose savagery and whose robust powers have together made them the preeminent force in South Africa."

Episodes of the story stand out as almost perfect bits of graphic narrative. The instances of the story are so full of life and interest that the reader is captivated one and not to be put down until the end is reached.
